

ICND 1 Lab Guide

To be able to use the labs first of all download Packet Tracer from the website under the labs section or from tools named **Packet Tracer.exe**.

Once downloaded double click on the exe file and install the application. It is a simple Wizard just asking where on your PC it can be installed.

Once installed you can download each of the labs from the website to your desktop and open them from Packet Tracer. To do this just open packet tracer hit file, open and choose the lab you would like to experiment with.
