

VMware View: Design

Duration: 2 Days **Course Code: VMVD**

Overview:

This hands-on training course explores the foundations of designing VMware® View™ architectures.

Target Audience:

System architects, system administrators, IT managers, and individuals responsible for designing VMware View architectures

Objectives:

- Design considerations to meet business needs
- The recommended design process
- VMware's best practices for a View deployment
- The layered architecture design model and the reference framework for a View design

Prerequisites:

Completion of VMware View: Install, Configure, Manage or equivalent experience with VMware View

Content:

Module 1: Course Introduction
Module 2: Design Methodology

- Design process
- Elements of a View deployment design
- Multilayered reference architecture

Module 3: Design Considerations

- Designing the access infrastructure
- Designing the virtual infrastructure
- Designing virtual desktops
- End-user session management
