

VMware View: Install, Configure, Manage

Duration: 4 Days **Course Code: VMVIEW**

Overview:

This hands-on training course builds your skills in the VMware View suite of products: VMware View Manager, VMware View Composer, and VMware ThinApp™.

Target Audience:

System administrators and system integrators experienced with VMware Infrastructure 3 who are responsible for their organization's deployment of VMware technology for virtual desktop infrastructure.

Objectives:

- After this course, the student should be able to:
 - Install and configure the VMware View components
 - Create persistent and nonpersistent desktop pools
 - Configure virtual desktops for printing, USB redirection, and multimedia redirection
 - Configure authentication using devices such as smart cards or cryptographic authentication fobs
 - Use VMware View Composer to deploy and manage linked clone virtual desktops
 - Package applications using VMware ThinApp for a VMware virtual desktop infrastructure
-

Prerequisites:

Required

- Experience in Microsoft Windows Active Directory (AD) administration
- Experience with vSphere

Recommended

- Completion of VMware vSphere: Install, Configure, Manage. Basic Skills Self-Assessment

You must already have these skills:

- Create a template in VMware vCenter Server and deploy a virtual machine from it.
 - Modify a template customization file.
 - Open a virtual machine console on vCenter Server and access the guest operating system.
 - Modify a virtual machine's hardware.
 - Configure Windows AD services.
-

Testing and Certification

There's no certification linked to this training.

Content:

Module 1: Course Introduction
Module 2: Introduction to VMware View

- View features and components
- Module 3: VMware View Connection Server
 - Installation and configuration
 - View Administrator
- Module 4: VMware View Virtual Desktops
 - View Agent
 - PCoIP and other remote display protocols
 - USB redirection and multimedia redirection
- Module 5: VMware View Client Options
 - View Client
 - View Portal
 - Thin clients and Offline Desktop
- Module 6: VMware View Administrator
 - Configuring automated desktop pools
 - Persistent and nonpersistent pools
- Module 7: Configuring and Managing Linked Clones
 - View Composer configuration
 - Deploying and modifying linked clone desktops
- Module 8: Unified Access
 - Accessing physical systems, blade PCs, Terminal Services
- Module 9: Virtual Printing
 - Seamless printing from desktop to client printer
- Module 10: Managing View Security
 - Network configuration and authentication options
- Module 11: View Manager Performance and Scalability
 - Performance enhancements and load balancing
- Module 12: VMware ThinApp
 - Deploying applications using ThinApp
